Education

Applied Science University Feb 2023 - Sep 2026
Bachelor's Computer Science

Field Training

Kayan HR — Mobile / Flutter Development Jul 2026 - Sep 2026

Flutter mobile development: REST API integration (Dio), Clean Architecture, local storage/offline strategies, Firebase services (Auth, Firestore, Storage, Messaging), performance profiling, and automated testing.

Projects

Elderlymed Devices and Supplied Jul 2025 - Nov 2025

.Full-Stack Website Development

Travel Company Website Aug 2024 - Sep 2024

.Full-Stack Website Development

Able+ Feb 2026 - Jun 2026

.A Flutter-based mobile app connecting people with disabilities to accessible services, charities, tutors, and community support across Jordan. Built as part of a four-person graduation team; contributed front-end development and UI/UX design, with navigation handled via go_router and a Supabase/Firebase backend.

Travel Company App Jul 2025 - Sep 2025

.flutter mobile application

NewsApp github.com/Mohamad149/NewsApp

.Flutter news application — REST API integration (Dio), navigation with GoRouter, dependency injection with GetIt, BLoC state management, and cached network images.

finalproject github.com/Mohamad149/project1

.Flutter mobile app + Flutter Web admin panel for request management, with Firebase (Auth, Firestore) backend, BLoC state management, GetIt, GoRouter, and Clean Architecture.

Languages

Arabic (Mother Language), English (very good)

Core Skills

Core Skills : Full -Stack , Data Analysis , Database , Java , Asp.Net , Flutter , State Management (BLoC/Cubit) , RESTful APIs (Dio) , Firebase (Auth, Firestore) , Clean Architecture , Git & GitHub

Courses In Progress

FUNDEV X with AI Bootcamp
coderz

2026 - Present

Full-stack and mobile bootcamp covering RESTful API development with ASP.NET Core, SQL Server and Entity Framework Core database design, CRUD operations with relationships and migrations, JWT authentication and authorization, and real-time features with SignalR and WebSockets.

Mobile track: Dart and professional Flutter development, responsive UI design and state management, secure backend integration, push notifications, Google Maps and device/camera features, and app deployment to Android and iOS — alongside using AI tools to speed up coding, refactoring, testing, and documentation.
