Summary

Computer Science graduate from ASU (2026) working mainly with Flutter. I've built websites and mobile apps for real clients, led a four-person team on my graduation project Able+, and just finished two months of Flutter training at Kayan HR. Looking for a junior mobile developer role where I can keep growing.

Experience

Mobile Development Trainee

Jul 2026 - Sep 2026

Kayan HR (Field Training)

- Built Flutter features following Clean Architecture and connected them to REST APIs using Dio.
- Worked with Firebase Auth, Firestore, Storage and Cloud Messaging.
- Added local caching so screens still work offline, profiled app performance and wrote automated tests.

Project Team Lead

Feb 2026 - Jun 2026

Ruby Labs

- Led the four-person team that built Able+ (see Projects).
- Split the work, tracked progress each week and handled most of the front-end and UI.

Development Specialist

Jun 2025 - Nov 2025

ElderlyMed Devices and Supplies

- Built a full-stack website for a medical devices and supplies store.
- Designed the UI and connected the site to the database for products and orders.

Application Specialist

Jul 2025 - Sep 2025

Travel Company (Mobile App)

- Built GoTrip, a Flutter app for a travel company where users browse destinations and deals, sign up and log in.
- Designed the screens and navigation, and made the layouts work across different screen sizes.

Development Specialist

Aug 2024 - Sep 2025

Travel Company (Website)

- Built the company website with pages for services, destinations and customer information.
- Handled the front-end pages and the database side, and cleaned up the site structure.

Projects

Able+

Feb 2026 - Jun 2026

Graduation Project | Team Lead

- Flutter app that helps people with disabilities in Jordan find accessible services, charities, tutors and community support.
- Supports four account types: tutors, charities, business owners and regular users.
- Added text-to-speech on the login screens and app menu to make the app easier to use.
- Available in three languages, with every screen translated.
- Flutter, Riverpod, go_router, Supabase, ASP.NET (admin panel) | [GitHub](#)

Admin Dashboard

Personal Project

- Web dashboard for managing users and requests, showing totals and pending requests.
- Companion Flutter app for reviewing and handling requests from a phone.
- Flutter, Clean Architecture | [GitHub](#)

- News App

Personal Project

- News reader that pulls live headlines from a REST API with Dio and caches articles for offline reading.
 - Flutter, Clean Architecture, REST API | [GitHub](#)

- Al-Rashid Renewable Energy

Web Project

- Arabic/English website for a renewable energy company, deployed on its own domain.
 - HTML, CSS | [GitHub](#)

- Expense Tracker

Personal Project

- App for tracking personal expenses by category, using Cubit for state management.
 - Flutter, Cubit | [GitHub](#)

Skills

Mobile: Flutter, Dart, BLoC / Cubit, Riverpod, go_router

Backend & Data: Firebase (Auth, Firestore, Messaging), Supabase, ASP.NET, SQL, REST APIs (Dio)

Architecture: Clean Architecture, OOP, SOLID

Web: HTML, CSS, JavaScript

Other: Java, C++, Data Analysis

Tools: Git, GitHub, Android Studio, VS Code, Visual Studio

Languages: Arabic (native), English (very good)

Currently learning: ASP.NET Core

Education

- Applied Science Private University

Mar 2023 - Sep 2026

- Bachelor's in Computer Science

- Coders Academy

Starting Oct 2026

- Full Stack Development (FUNDEV X with AI Bootcamp)

Certificates

- Cloud Foundations

Apr 2026

AWS Academy

- Azure Fundamentals

May 2026

Microsoft

- Data Engineering

Jul 2026

AWS Academy

- Data Analytics Essentials

Sep 2025

Cisco Networking Academy

Activities

- UI & UX Design Competition v5

May 2025

Applied Science Private University
